

## VT LINER RECYCLING COLLECTION SITES

We are so thankful for our recycling partners who have offered to help us collect clear label liner! Choose the most convenient location from the list, and be sure to check the instructions for your preferred location. Please log your drop off on the digital form, or printed form at the collection site.

### BUT FIRST!

- Save your clear label liner after label application.
- The liner MUST NOT be on a core, must not have ANY labels, tape or other materials attached.
- The liner MUST be kept CLEAN, DRY and separate from any other liner or waste.
- Contaminated liner will render the material unfit for recycling and the load will be diverted to a landfill.
